

Radio as a Service

Revolutionary professional two-way radio solutions

designed to exceed expectations

We've designed our Radio as a Service (RaaS) to challenge the conventional

RaaS allows you to connect without compromise, experience the ultimate convenience, save time and never have to stop doing what you do best. We understand how crucial flawless communications are to your organisation which is why you can rely on us to take care of all your two-way radio requirements leaving you free to focus on your operations and exceed your goals.

A game-changing two-way radio communications solution

With Radio as a Service, you pay a fixed cost per radio per month which includes everything needed to give you the level of radio coverage you require; this can be paid monthly, quarterly or annually as you'd prefer.

The cost is determined based on a range of factors that are unique to your organisation including the number of users, radio license costs and the size of the coverage area; we'll discuss this with you in detail during the planning stages.

Our expert team have many years' experience in deploying radio solutions in a variety of commercial and business sectors, including the military, meaning they are best placed to advise you on your optimum level of service.

Count on us for outstanding coverage

Our RaaS is suitable for even the most demanding levels of coverage. No matter how complex your requirement is, we will provide the radio hardware, engineering, installation, Ofcom licences, remote monitoring, maintenance visits and every other element required for a fixed monthly per radio cost.

Also available under the RaaS is our Control Room (Dispatch) systems which equips your key personnel with a next-generation Computer Aided Dispatch (CAD) system.

RaaS is the smart flexible solution you need. No hidden fees. No surprises.

What's included in Radio as a Service:

- The two-way radio handset, battery & antenna
- Battery chargers (choose from multi or single)
- Repeaters if required
- Radio frequency licence (provided by Ofcom)
- Replacements and repairs
- Technical support

Plus, every 4 years we'll replace all of your radios so you always get to enjoy maximum performance.

What it costs:

The fixed cost will be bespoke to your requirements and will start from £23.00 per radio per month.

If we determine you need an on-site system, which we refer to as a repeater, to achieve the required radio coverage, the cost for this starts from £140.00 per month.

As an example based on the costs above, if you have 10 radios and a single repeater, your cost will be £340.00 per month.

Injecting scalability into your tailored needs:

With Radio as a Service it is easy to scale up as needed in response to your changing requirements. Based on the example above, should you need 5 more handsets your monthly cost will rise by £115.00.

With RaaS you remain in complete control.

Our quibble free approach to replacements and repairs:

Should a piece of equipment break or get lost, we'll arrange for next day replacement or repair. The same goes for system issues, if anything goes wrong, we'll be there the next day to sort things out for you.

And remember, as we monitor everything remotely, we'll do everything we can to address issues before they even arise.

Powerful advantages: The wider impact of RaaS

Secure the success of your future with our unrivalled expertise, experience and efficiency. Included with RaaS is the vast knowledge of our highly talented team to elevate every element of your communications needs. Plus, our cutting-edge service empowers you to free up your resources to add real value to your operations.

Improve your cashflow with increased flexibility

Paying for a monthly, quarterly, or annual service means that you'll be able to finance this business expense through OPEX.

Spread the cost of this vital service without the need for a large one-time expense.

Should you change your requirements, OPEX can be adjusted easily.

OPEX allows you to get set up quickly.

Preserve your capital for other investments or to help you explore opportunities.

No more having to seek CAPEX approval to purchase a radio.

Reduce your risk

With RaaS you won't own the two-way radio handsets meaning you never have to worry about maintenance or repair costs, or the equipment becoming obsolete and remember, all of your radios will be replaced every 4 years anyway.

Effortlessly manage your service through our user-friendly online portal

To further enhance your experience of our Radio as a Service solution you'll have access to our secure web portal that's personalised just for you. From here you can report issues, manage your contract, download training material, and keep updated on any planned service visits or maintenance windows.
